Subject: Re: NRCPD

Dear Andy

We put your proposal to set up a register of CSWs to the board where it was received with interest. Members considered the process to take the proposal forward and agreed as follows:

1. Situation analysis to provide answers to the questions that arose from the board's first reading of the proposal and seek to identify a solid opportunity for NRCPD to act.
2. Development of a proposal for regulating this area of practice.
3. Stakeholder consultation on that proposal.
4. Final discussion and decision.

Progression through the process will be dependent on the outcome at each stage. The board has committed funds to undertake stage 1 and we've asked a couple of consultants to help us get that underway. I know how important it is to you and we will progress it as quickly as we are able. We'll be looking to involve ACSW and NATED formally quite soon.

Please thank everyone who was involved in putting the proposal together it was obviously a lot of work. We're looking forward to exploring this with you.

Best wishes

Angela
